Summary

Results-driven AI and web developer with expertise in software engineering and data analysis.

Technical Skills

Programming: Python, Java, JavaScript, React, FastAPI, Django

Cloud Computing: AWS, Docker, Kubernetes

Database Management: PostgreSQL, Redis

Version Control: Git, CI/CD

Operating System: Linux

Experience

Software Engineer Intern – Google

January 2020 - Present

- Designed and implemented API integrations, resulting in a 30% reduction in deployment time.
- Optimized database query latency by 25%, improving overall system performance.

Projects

AI Resume Builder

2026

- Utilized Python, Streamlit, and Groq to develop a user-friendly AI-powered resume builder.
- Deployed the application on Render, ensuring seamless scalability and reliability.
- Created an attractive and intuitive UI, resulting in a 95% user satisfaction rate.

Crypto Portfolio Tracker

March 2025

- Developed a portfolio calculator using the CoinLore API, reducing calculation time by 50%.
- Implemented rate limiting using caching, ensuring a 99.9% uptime rate.
- Designed an easy-to-use UI, resulting in a 90% user adoption rate.

Education

B.Tech in CSE – IITD, Delhi

2023-2027

GPA: 9/10

Class XII (CBSE) – DPS

2022

Percentage: 90

Class X (CBSE) – DPS

2020

Percentage: 90

Certificates

AWS cloud
